

## POWER SYSTEMS ENGINEER

(M/F)

At Voltaia we are passionate about renewable energies. We are an international company (listed on Euronext Paris since July 2014) and we produce electricity from multiple power sources (wind, solar, hydro and biomass). Today we have a total installed capacity of 451 MW and we also provide services on behalf of third-party clients such as development, construction, maintenance and exploitation of energy production sites. With a booming growth, our group is already present in 17 countries over 4 continents and we offer to our clients a global operating capacity. Besides the group strongly contributes to the socio-economic development of the regions where it is present and cultivates partnerships profitable to all the stakeholders, at all levels.

If you share our ambition and our passion for renewable energies, Voltaia has a career for you!

Our **Center of Expertise Business Line** is looking for a **Power Systems Engineer** for its **Operations**. Reporting to the Method & Process Leader, will have the following responsibilities:

- Provide training and technical workshops to spread and consolidate maintenance competences and skills;
